

Don't miss this opportunity to gain valuable hands-on experience with the industry's most powerful HVAC/R controller. This course combines in-depth knowledge with extensive practical training in setting up, servicing and troubleshooting the E2 control system. This course covers refrigeration, building and convenience store applications. The course work is reinforced with hands-on navigation and exercises on E2 training simulators equipped with working peripherals.

Course Agenda

One Day Class

- E2 Hardware and Software Foundation
- E2 Controller Setup
- Peripherals Used With the E2 Controller
- Networking and Network Troubleshooting
- E2 Controller Navigation
- Understanding E2 Application

Three Day Seminar

- All Topics Covered in One Day Class
- Programming E2 RX Controller Applications (Theory, structure, parameter changes and setup)
- Programming E2 BX Controller Applications (Theory, structure, parameter changes and setup)
- Valuable **Hands-On** Exercises to Reinforce Instructor-Led Training (Exercises performed in pairs or small groups)

Feel the power of success!

Program Details

Who should attend?

- AC Technicians
- Refrigeration Technicians
- Contractors
- End User Service Technicians
- Installers
- Service Managers
- Facilities Engineers
- Mechanical Service
- Installation Technicians

Which course is right for you?

1-day class	3-day seminar	Who should attend
X	X	Energy management system technicians
X	X	Refrigeration service and installation technicians
X		End users (service)
	X	Application and facility engineers
	X	Project managers
